# INNOVATION

by Marcellus Mindel,  
Head of IBM Academic Partnerships

Proprietary invention in search of purpose is out! Open, collaborative and multi-disciplinary approaches to innovation are taking centre stage in the shaping of new ideas and creation of tangible value for business, individuals and the world. The computing discipline – present, historical and hypothetical – will motivate a sampling of insights into these and other challenging questions

## ***Highlights***

- What forces are behind this trend?
- What new demands will be placed on students, educators and tech professionals?
- How can we prepare for these challenges?
