

Managing the development of AI and Machines that learn.

ABSTRACT:

It is widely acknowledged that AI technology will transform organizations and society around the globe – and with recent advancements in processing power, data accessibility, and algorithms we suddenly find ourselves at the beginning of this transformation. Introducing the Machine Trust Index (MTI), assisting us to boldly proceed with a responsible, innovative spirit. The goal of the MTI is to establish an open and versatile framework for measuring and managing trust in the evolving sphere of AI. The MTI provides measurable evidence, transparency and accountability of an AI solution, allowing providers to effectively communicate the value of their solutions as well as their measurable trustworthiness.

Admission is FREE!

Everyone is welcome!

Location: 4359 Mackenzie Building, Carleton University.
